

DBBEAUTY(1)

(dbbeauty 1.2)

DBBEAUTY(1)

NAME

dbbeauty - 4GL program beautifier

SYNOPSIS

dbbeauty [file...]

DESCRIPTION

Dbbeauty reads 4GL programs either from "file" or from standard input and writes them on standard output with keyword capitalization and indention that displays the structure of the code.

NOTES

Dbbeauty only converts keywords to upper case at this time.
The next major release of dbbeauty will support indention.
