

DBFORM(1)

(dbform 1.2)

DBFORM(1)

NAME

dbform - generates default data entry forms

SYNOPSIS

dbform -d dbname -t tablename [-t tablename...] [-c]

DESCRIPTION

Dbform generates default data entry forms for "quick & dirty" access to Informix database tables.

OPTIONS

-d database name

-t table name

-c color used to display the data

NOTES

Dbform requires that Informix-SQL be installed on your system.

YELLOW/BOLD is the default color when -c is not specified.

Serial fields are tagged with the REVERSE attribute.

KNOWN ISSUES

Dbform can only support a MAX of 26 single character fields.

SUPPORT

Send bug reports to Dave Snyder <dave@snide.com>
