

VIE(1)

(vie 1.2)

VIE(1)

**NAME**

vie - views/corrects Informix-4GL error files

**SYNOPSIS**

vie progname.err

**DESCRIPTION**

Vie will allow you to view and correct an Informix-4GL source/form error file using "vi".

**OPTIONS**

progname.err is the Informix-4GL source/form error file

**NOTES**

Vie can be fooled if the words MAIN, FUNCTION, REPORT, GLOBALS, or ATTRIBUTES start at the beginning of a line in a file that they normally wouldn't be in.

Vie makes a backup of the Informix-4GL source/form file before replacement with the error file.

**SUPPORT**

Send bug reports to Dave Snyder <[dave@snide.com](mailto:dave@snide.com)>
